

WORLD HAPPENINGS  
BRIEFLY TOLD

A new flight into the stratosphere is being planned by Prof. Auguste Piccard and his associate, Max Cosyns, it was learned at Brussels.

The British Air Ministry wants 1,300 boys between the ages of 15 and 17, with sound education, to enter the Royal Air Force as aircraft apprentices next August.

The British government, in consultation with the dominions, will be urged by the British Empire Service League to provide machinery for the enlistment of a quota of dominions men in the imperial forces.

The commonwealth's bureau of statistics estimated 97 per cent. of Australia's population of 6,725,000 was of British extraction. About 86 per cent. was Australian-born the bureau said.

Poland is seriously considering mass evacuation of Jews to Palestine, to French Madagascar off Africa, or to some other haven to avoid future anti-Semitic disturbances in the country.

McGill University announced the appointment of Dr. W. H. Brittain, vice-principal of Macdonald college, as its temporary principal pending appointment of a successor to A. E. Morgan.

Water poloists of Sydney, Australia, are seeking to have the game recognized as an official sport at the Empire Games there next year and if successful, Canada, South Africa and England, may send teams.

The French army is the strongest and best equipped in Europe, Die Wehrmacht, Reich war ministry organ, declared in a special edition devoted to a review of "the war strength of France" and its "aggressive designs" against Germany.

## Strange Customs

Oddities Of Life Among The Natives  
Of Papua

These oddities of life among the Aboriginal natives of Papua were culled from the annual report of Lieut.-Gov. Sir Hubert Murray to the commonwealth government.

The first native appointed a village constable in Kerens district arrested his own ward for murder.

On a tributary of the Purari river, a patrol found a two-storey house, 75 feet long, built in living trees. Women occupied the lower floor and men the upper.

Women on the upper waters of the Barjai river cut three-foot lengths of bamboo. These they will fill with food, cork up one end, and put in flames. When the bamboo blancks and begins to crack they regard the food as cooked.

At the village of Marau, pigs have abnormal feet, apparently because they walk on soft sand. On each foot are long, horn-like growths five inches long and turned up at the tips like a Turkish slipper.

## In The Land Of Egypt

Great Reclamation Scheme To Be  
Undertaken By Government

Vast areas of waterless desert will be fertilized under a great reclamation scheme to be undertaken by the Egyptian Government in the Western desert of Egypt. In these wastes, where for the past seven years famine and starvation have threatened the Bedouin tribes of the desert owing to lack of water, the Government has planned far-reaching improvements. Wells are to be bored, live goats, camels and a sun of money are to be allotted to each Bedouin family, and a motor road from Alexandria to Sollum, on the Egyptian-Libyan frontier, is to be built.

## Aid For Travellers

Impossible To Miss Train If New  
Service Works

Missing the train is a minor tragedy that may never again occur if the service being tried experimentally at Sterling, Illinois, proves successful. Any Chicago & North Western patron who wishes to catch the 6:17 a.m. train may telephone the station agent the night before and be assured that he will be called just one hour before the train arrives, whether it is late or on time. If successful, the service may be extended to other cities.

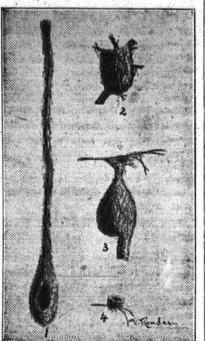

## Find Giant Tree

An Australian eucalyptus tree which scientists claim was originally 400 feet high has been discovered in the remote part of Tasmania. Discoveries of the tree said the upper section has fallen off. Six feet above the base the tree has a diameter of 35 feet. Distance to the first limb is 170 feet.

France imported \$42,694 worth of American fishing tackle last year.

Interesting Birds' Nests  
Specimens Gathered From Many  
Countries Interesting To Nature  
Lovers

The sketches which accompany this article show birds' nests which are rather interesting, especially to nature lovers.

No. 1 is supposed to be a Tailor Bird's nest and came from Singapore, East Indies. It measures four feet long. There must be different species of the Tailor Birds. Some actually save leaves together. This special nest is made entirely out of grass and is worked around a main blade which is somewhat like the blade of a bushrake.

No. 2 is a Baltimore Oriole's nest and is rather unusual for it has about ten different colors. There are bands of variegated silk and cotton. These were hung in a tree and were used by the Oriole mother in building her interesting nest.

No. 3 is a Weaver Bird's nest and came from Indore, Central India. It is made of a fine straw and is a masterpiece of weaving. The tube which hangs under the nest is about four inches long. The nest is about 18 inches long.

No. 4 is the tiny home of a Humming Bird. The nest is about two inches wide. It is made of plant down. These nests were collected by Dr. V. Rondeau, dentist of Rouleau.

## Does Thorough Job

Vacuum Lawn Mower Cuts  
And Cleans Up Grass

Resembling a vacuum cleaner both in form and action, the latest lawn mower is the vacuum. And then sucks the cuttings, leaves, twigs, and small rubbish into a container. Thus it does a thorough job of cleaning as it goes. Cutting is done by scythe-like rotary blades which are turned by direct drive from a gasoline engine. The cutting blades of the mower are adjustable and can be set to cut the grass to any height desired. The blades are hollow-ground, and it is their rapid revolving that creates the suction which draws the mowed grass and rubbish into the large container located at the back of the machine.—Popular Mechanics.

The noted plant wizard, Luther Burbank, won his first great triumph with the Burbank potato.

Housewives of Mexico are demanding electric refrigerators in their homes.

China's improved roads are five times as long as in 1930.

Sleeping Powder Insanity  
Misuse Of Chemicals Results In  
Many Mental Cases

Sleeping powder insanity, a new mental hobgoblin among the "pay-phones" that are relentlessly increasing in the United States, was reported to the American Psychiatric Association at Pittsburgh.

It is one of the strange reactions of human beings to misuse of the flood of new chemicals coming from the scientific, synthetic laboratories. There is no doubt, said Frank J. Curran, M.D., of Bellevue Hospital, New York, of a definite increase in mental illness from over-indulgence in one of these new recent drugs, known as the barbiturates.

Sixty different barbiturates are manufactured. Hundreds more can be made easily by test tube combinations. They are, he said, the most frequently used ingredients in hypnotic and sedative drugs. They are given by physicians for many forms of illness.

Dr. Curran, when taken unrestrictedly by laymen, they may induce insanity. The results include stupor, convulsions, halting speech, trembling tongue and lips, shaking fingers and unsteady gait. He described 114 of these barbiturate sleeping powder insanity admitted to Bellevue.

Second to the barbiturates in causing the new type of insanity stands an older drug, bromide. The victims of misuse of this sea flowers, hear voices, imagine they feel electric shocks. Instances of 63 bromide insanity were given; also of 21 whose minds went wrong from a combination of both barbiturates and bromides.

## Gardening

There are two groups of garden insects—those that eat holes in the leaves and those that eat the juice. For the first-named, poison is usually applied, while the suckers are attacked with sprays. Often when both are present, a combination of poison and something that burns, such as lime, sulphur and arsenate, is used.

The damage from the biting insects is quite apparent but the presence of the other kind is only shown at first by a winking or withering of the foliage.

For the aphids, which are the aphids or plant lice, spray with whale oil soap, a quarter pound of soap to a gallon of water.

"Black Leaf 40" or any other pepper extract secured from a reliable seed store.

Fungus attacks the plants, the foliage usually turns yellow or brown, or white spots like mildew cover the leaves. Fungus is most common in winter, mildew in summer.

Spraying with Bordeaux Mixture, dusting with specially finely ground sulphur is advised. Sulphur dust will protect the plants and aphids from the sun if applied when the sun first rises above the horizon.

## \$10,000,000 LOSS TO PROVINCE IN TOURIST TRAFFIC

Because this province did not have proper highways, it lost \$10,000,000 worth of tourist business in 1935, the last year for which official figures are available.

More than the whole population of the Dominion, an army of 15,000,000 tourists, all Americans, stands ready to invade Canada on 24 hours' notice.

It has been estimated that 8,000,000 will sweep, when the hour strikes, into Ontario. Some 80,000 will descend upon the southwestern section of British Columbia.

Alberta would be attacked by some 10,000. But the invasion would be stopped immediately by a barrage of dust before this province had been penetrated more than 50 miles. Some of the best units of the motorcycle will have been bogged down in mud holes axle deep.

The dust barrage and mud hole defenses along the Alberta sector, it is estimated, kept more than \$10,000,000 out of the pockets of Alberta farmers, because the defeated army, thus defeated, retired to other playgrounds.

Furthermore, the invaders resolved never to return and to urge their friends not to invade Alberta until the province has hard surfaced roads.

In 1935, an army of about 15,000,000 Americans in high powered cars invaded Canada, did no damage to the rights and privileges of the country, merely took in the sights and paid \$131,000,000 for the privilege before going back to their homes to mind their own business.

"Give us hard surfaced roads and we will begin to get our fair share of the tourist trade," said an official of the Alberta Motor Association.

Professor: "If I say 'week,' you think of 7 days. Then, if I say '90 days,' what do you think of?"

Student: "Jail."

"Some advise moderation," said the temperance orator, "and some recommend total abstinence. Now, what is the great drink question?"

"What'll you have?" said a voice.

English Professor: "Mr. Gish, correct this sentence: 'Girls is naturally better looking than boys'."

"Joe Gish: 'Girls are artificially better looking than boys.'"

A teacher told her class to compose a verse containing the words "anatomy" and "anatomy." One bright pupil wrote:

My analyze over the ocean.

My analyze over the sea;

My analyze over the ocean.

Oh, bring back my anatomy.

Bring in the oysters I told you to open," said the head of the household, growing impatient.

Waitress (with a platter of shells): "There they are," she said proudly. "It took me a long time to clean them, but I have done it at last, and thrown all the insides away."

Hilda visited a fortune teller. She read his palm and shook her head. "Bad news. You are going to die on a Jewish holiday."

"Me? On a Jewish holiday? How's that?"

"Any day you die would be a Jewish holiday."

## \$12,000,000 PROJECT

## PLANNED IN ONTARIO

The biggest construction job in Canada is now being undertaken on the north shore of the Gulf of St. Lawrence at Baie Comeau and Outardes Falls, where the Ontario Paper Company is spending \$12,000,000 on development. The project calls for employment of 5000 men, and shipment of 110,000 tons of construction material and supplies.

A new city is springing into being. Orders for equipment and supplies have been placed all over Canada. A continuous stream of freight from manufacturers throughout Canada is pouring into Montreal to be transhipped to Baie Comeau, where the paper mills are being constructed.

Daily water freight service has been established from Montreal to transport 4500 freight-car loads of building materials, machinery and supplies. An average daily handling of 600 tons is anticipated throughout the navigation season.

First-class construction in housing conditions are provided for the army of workers. Private residences, commercial stores and service establishments are being rushed to completion. Roads, telephone lines and all other permanent means of transportation and communication are also being installed.—Ex.

Blackmore and his associates should go away back and sit down after their failure to elect a Social Credit candidate in British Columbia.

Although the fishing season doesn't open until a week from next Tuesday, Mar Poy was seen carrying three fishing rods yesterday. Poy says the early worm catches the bird.

After seventeen years in the Alberta provincial police and the R.C.M.P., Percy Olmstead has resigned, and left Lethbridge Wednesday to make his future home at Palo Alto, California, where he has purchased a filling station. Mr. Olmstead, a native of Maine, has been a chauffeur for the police for many years. He joined the A.P.P. when Inspector Risk was in charge of the Lethbridge detachment and was taken over when the force was transferred to the R.C.M.P. Mr. Olmstead and family are already located in Palo Alto.

Mother: "Now, Willie, I want you to go in and get acquainted with the new nurse, and kiss her nice."

Willie: "Yes! And get my face slapped like papa did?"

Mother: "Well, Johnny, did you enjoy yourself at your father's club last night?"

Johnny: "Yes, mother; but the men kept saying 'Aunty, Aunty' all the time, and I couldn't see any ladies there at all."

The SNAPSHOT GUILD  
DON'T INCLUDE TOO MUCH IN ONE PICTURE

This picture, while striking, is really two pictures in one.

ONE of the faults often seen in the work of an amateur photographer, especially of a beginner, is the inclusion of too much in one picture. He tries to "hog the whole show," as it were, with results that are uninteresting or distracting.

For example, from the top of a mountain or other eminence, he is inclined to take in a wide expanse of country, several hundred square miles of it spreading to the horizon in a great semi-circle—and promptly tries to compress it into a few square inches of film. The result on the film is little more than a wavy or jagged line—the horizon line—separating a white space from a dark sky. He failed to note that all the interesting details was crowded up in the vastness of the scene.

Such a panorama may be saved by beautiful cloud effects obtained by using a color filter and, of course, the camera must be used, as it is, as a "record" picture of a visit, but vastness unrelieved by nice detail generally makes a poor picture. Better, however, for some one to walk back and forth in the foreground. A foreground object—a single tree, a human being, a grazing cow, a nearby cottage, on the mountain slope often will make all the difference in a scenic picture between something interesting to look at and little or nothing.

Again, in nearby scenes, there is frequently material for two or even more complete pictures that the picture taken has crowded into one, with the result that the picture is divided from one point to another, producing a sense of irritation rather

than of pleasure. All right in a striking circus. If you like, but not for a good photograph. Selection, leaving out what is not really required, is a lesson to be learned. The view point should be chosen carefully, remember that much that is unnecessary may be eliminated, or at least made unobtrusive, by moving the camera to the right or left, up or down, nearer or farther away, by focusing from different planes, or by using different diaphragm openings in the lens.

But sometimes, you say, how can you help getting in several objects of competing interest when Nature or circumstance has them in the picture? Well, if you can't get out of this situation cannot always be easily avoided but, when you are confronted with it, you may find yourself lucky after all. Go ahead and shoot and then examine your print. Imagine that you are the person of interest of a girl in a bathing suit about to dive from a row-boat in mid-stream. You have to snap the picture from the river bank fifty feet distant. You find when the print is taken that instead of the girl, the boy is rivaled by that in a small boy in the foreground at the right, fishing from the river bank. Beyond, diagonally across the river on the left is a dam and picturesquely old mill in a setting of willows. You have three sections of the picture to choose from. You take your print and mark each one of these interesting pictures from the two others, mark them and have the corresponding sections on the negative separately enlarged.

Mark the print and make it by enlarging a selected portion of the miscellaneous composition.

107 JOHN VAN GUILDER

## Smart, Anyway

Our neighbor's little boy has difficulty pronouncing the letter "R" correctly. Yesterday the teacher, thinking to improve his speech, asked him to repeat this sentence after her:

"Robert gave Richard a rap in the ribs for roasting the rabbit so rare."

The boy was stunned for a moment, then he said:

"Bobby gave Dick a poke in the side because he didn't cook the bunny enough."

Mother: "Well, Johnny, did you enjoy yourself at your father's club last night?"

Johnny: "Yes, mother; but the men

kept saying 'Aunty, Aunty' all the time, and I couldn't see any ladies there at all."

## MANY TYPES OF TAXES

There are more than 200 types of taxes in North America imposed on the oil industry.

Several of them are collected on every operation of the business from setting up equipment in the oil fields to selling gasoline and lubricating oil and gas lands, as well as severance and royalties, production taxes, and pollution taxes, well drilling permit fees, and derrick taxes.

Producers of crude oil and natural gas, for example, pay taxes on crude oil and gas produced, oil withdrawn from storage, sales of oil and gas lands, as well as severance and royalties, production taxes, and pollution taxes, well drilling permit fees, and derrick taxes.

Refiners pay taxes on refined products. Pipe line companies pay property taxes on their pipelines, and oil companies taxes on the crude they transport, and a big variety of other levies.

Marketing companies and service stations pay taxes on the different products they sell.

It is a series of tax levies that perhaps no other industry can show; in the total a huge burden, paid by the industry and users of its products.

## BAD MEDICINE

A Crows' Nest Pass resident, who recently played the host to a number of friends, including several clerical gentlemen, has a very red face. Eschewing all intoxicants, the clergy asked for something in the line of soft drink. The host goured the company what he believed to be lime juice—so the label on the bottle assured him. It was turpentine.—Ex.

## ... for Economical Transportation"

Pick the  
QUALITY CAR  
in the  
Lowest Price Field

ONE of the best things about Chevrolet quality is the way it saves you money on gas, oil and upkeep—and assures you of higher "trade-in" value later on.

For instance, the quality design of Chevrolet's Valve-in-Head Engine saves you as much as 10% on operating costs! Knee-Action, on Master De Luxe models, saves you dollars on "tightening-up"—because it cushions the car, as well as the passengers,

against the pounding of rough roads. The United Turret Top Bodies by Fisher are solidly built to "stand up," without developing annoying rattles and squeaks.

From perfected Hydraulic Brakes to genuine Fisher No-Draft Ventilation, Chevrolet is every inch a quality product—famous for dependability! See it and drive it yourself...listen to what owners say...and you'll never be satisfied with less!

PRICED FROM

\$745

Master De Luxe Business Coupe delivered at Interlock, Ontario. Government taxes, license, insurance, oil, gas, etc., extra. (Prices subject to change.)

...to passenger sedan and Motors Insurance Plan.

## District News

From Our Own Correspondents

### HILLCREST HAPPENINGS

Rev. John Wood, son Jack and daughter Elva returned from Edmonton on Saturday.

The Bellevue midget softball team swamped the Hillcrest team 10 to 1 in a game here on Wednesday.

Mr. and Mrs. H. McVicar left Monday for Glace Bay, Nova Scotia, where they will spend their holidays.

The service at the United church on Sunday last was taken by Rev. R. Upton, of Bellevue.

A large number of Hillcrest children are confined to their homes through measles.

The Hillcrest seniors defeated the Hillcrest juniors on Sunday 12-8 in a regular schedule C.N.P. baseball league game.

### BELLEVUE HAPPENINGS

Miss Doris Charovano entertained a number of friends at her home on Thursday evening, in honor of Miss Frances Costick, who was visiting here with her parents.

Miss Frances Costick, after spending three weeks here with her parents left Friday evening to resume her studies as nurse-in-training at the Royal Jubilee hospital at Victoria, B.C.

Jack Hutton, of Edmonton, after spending several days here with his mother, sister and brothers, returned to his home on Monday.

Mr. H. Meade and Rev. R. Upton returned over the week end from Calgary, where the latter attended the sessions of the United Church conference.

The town was shocked on Saturday morning to learn of the sudden passing of Mrs. Caroleana Bogen, beloved wife of Carlo Bogen, well known carpenter of the town. Mrs. Bogen had been in ill health for some months, but her death was unexpected. The sympathy of all is extended to the bereaved husband.

Mrs. Gordon Key and Miss Tecla Favero were joint hostesses at a nicely arranged miscellaneous shower at the home of the former on Friday evening, in honor of Miss Eva Bovio. The evening was spent in whist and bridge, prize for whist being won by Miss Evelyn Price, and for bridge by Mrs. W. Cousins. Following cards, a dainty luncheon was served by the hostesses, following which the guest of honor was presented with a well filled basket of beautiful and useful gifts. Miss Bovio thanked her assembled friends for their kind remembrances and well wishes.

A very quiet but pretty wedding was solemnized in the United church manse on Saturday evening at 7:30, when Miss Eva, eldest daughter of Mr. and Mrs. J. Bovio, became the bride of Jean (Johnny) Frank Ruymakers, son of Mr. E. Ruymakers, of Bellevue. The bride was lovely in a brown tailored suit with matching brown accessories, and wearing a corsage of roses. She was attended by Miss Tecla Favero, who also looked lovely in a tan tailored suit with matching accessories, and wearing a corsage of roses. The groom was supported by his brother, Simon Ruymakers. Following the ceremony, the bridal party went to the home of the bride's parents, where a dainty buffet supper was served to immediate friends and relatives of the bride and groom. The serving table was centred with a two-tier wedding cake. The happy couple are making their home in Bellevue.

The home of Mr. and Mrs. J. H. McLean was the scene of a pretty wedding at 1:30 p.m. on Tuesday, when Roy Foster, of Coleman, brother of Mrs. McLean, and Miss Betty Thomas, were united in marriage. Rev. R. Upton performed the ceremony. The bride, who is the daughter of Mr. and Mrs. Roy Thomas, of Coleman, looked lovely in an ankle-length gown of coronation blue crepe and carrying a bouquet of spring

flowers. The bride and groom were attended by Mr. and Mrs. McLean. Following the serving of a cold supper, with spring flowers as decorations, the happy couple left on a honeymoon to be spent in Calgary. They will later take up residence in Coleman.

### COWLEY HAPPENINGS

Joe Wilson and Clarence Schumacher have gone by motor to Nelson, B.C.

Bill Potapoff and Kenneth Russtaz have gone to Grand Forks, B.C., where they expect to spend several weeks.

Miss Helen Morrison has returned from Edmonton, where she recently graduated at the Alberta University.

Miss Dorothy Dwyer, of Coleman, paid a visit to her parents here the early part of the week.

Mr. and Mrs. Schumacher and Miss Dorothy, of Claresholm, were guests of Mr. and Mrs. Earl Mathewson over the week end.

Mrs. Lou Lemire and her three children left Wednesday, the 27th of May, for a visit of three months with relatives in Quebec.

Mrs. C. Latta returned to Kimberley with her daughter, Mrs. Colvin, to spend a few weeks there.

Mr. George Porter has gone to Macleod, owing to the illness of her daughter Josephine, who recently underwent an operation for appendicitis.

Mr. H. Meade and Rev. R. Upton returned over the week end from Calgary, where the latter attended the sessions of the United Church conference.

The town was shocked on Saturday morning to learn of the sudden passing of Mrs. Caroleana Bogen, beloved wife of Carlo Bogen, well known carpenter of the town. Mrs. Bogen had been in ill health for some months, but her death was unexpected. The sympathy of all is extended to the bereaved husband.

Mrs. Gordon Key and Miss Tecla Favero were joint hostesses at a nicely arranged miscellaneous shower at the home of the former on Friday evening, in honor of Miss Eva Bovio. The evening was spent in whist and bridge, prize for whist being won by Miss Evelyn Price, and for bridge by Mrs. W. Cousins. Following cards, a dainty luncheon was served by the hostesses, following which the guest of honor was presented with a well filled basket of beautiful and useful gifts. Miss Bovio thanked her assembled friends for their kind remembrances and well wishes.

## The SNAPSHOT GUILD

### SNAPSHOTS FROM THE AIR

When you say, "We went 'way above the clouds," why not have a snapshot to prove it?

THOSE who make air voyages without a camera miss a part of the thrill. You do not need an especially designed camera to obtain photographs from airplanes. An ordinary camera will get interesting pictures right through the window which you look through as you fly, and make you a picture story of your trip that no end of verbal description can tell so vividly.

Make a few snaps about the airport before boarding your plane and then, when you are about to start, stand back, wait, before you shoot again till you are up at least 1,000 feet. Naturally the higher the 'plane is traveling the less rapidly will the earth slip by and snapshots showing the land can be made more easily. Take a few pictures when you pass over the clouds, when there are definite contrasts in the landscape, as when flying over lakes, rivers and towns.

If your camera is of the 'instant' type, set it at the "infinity" mark, and when you are about 1,000 feet, stop the shutter speed to 1/22 sec. This should produce good negatives at a reasonably rapid shutter speed. When the sun is not so bright, stop 16 will yield satisfactory results.

The fastest shutter speed should be employed with the average camera; this is 1/60 sec. This is the best speed for fast shutter speeds pictures from airplanes can be made at less than the 1,000 foot height. With single lens folding cameras and those of the box type, the second or smaller diaphragm stop should be used. Surprisingly good pictures can be made

consolation; Frank Pizzola, gent's first; Father Sullivan, consolation.

Good music for the dance was supplied by Orin Purkhart, William Thibault and Leslie Franz. A tasty repast was served by the hostesses. There was a good attendance, and a very enjoyable time is reported.

The Cowley ladies' Home Helpers' Club was entertained at the monthly meeting by Mrs. Jessie Snyder at her home on Thursday evening. At this meeting arrangements were made to hold a bee at the Cowley cemetery, and to have the border of trees surrounding it cultivated on the afternoon of June 2nd. They also decided to send \$10 to the Woods' Christian Home near Calgary. For the past year, after business of meetings was disposed of, the gentlemen were invited, when a series of five hundred card games were played, with prizes being given at the end of the period only. The lucky winners this time were Mrs. F. A. Tustian, sr., and Mr. A. J. Snyder, firsts; Mrs. Robert Littleton and Mr. Archie Swart, consolations.

The evening was most pleasantly ended with a delicious repast served by the hostess. On this occasion, it was a treat to the guests to have the pleasure of seeing Mr. Snyder's garden so far advanced at this time of year with some of the early vegetables already large enough for table use. The place was fresh with greenery and a profusion of early blooming flowers, such as pansies, tulips, etc., all gay in a riot of color; but the most outstanding feature was a few young cherry trees white with blossom. Mr. Snyder is also experimenting with apple trees, these looking very rank and healthy. They have borne blossoms. This garden is located in the lee of a natural shelter belt in the bend of the river. The formation of the soil is a rich sandy loam, and Mr. Snyder has rigged up a water wheel, whereby water is pumped up to the garden with a generous supply at his command whenever needed.

Beginning at 2 o'clock Saturday morning, a steady downpour of rain fell over the Cowley district for nine hours, adding another inch of moisture to the soil. There is much rejoicing here, and a renewed hope of fuller harvests and greener pastures. The rain will also help to rid the land of the plague of young grasshoppers and other field pests.

A card party and dance was held in the Todd Creek school house on Wednesday night, under auspices of the ladies of St. Joseph's church, Cowley. The early part of the evening was spent at progressive whist, at which prizes were won by Mrs. James Irwin, ladies' first; Mrs. Earl Mathewson,

### JAP DESCRIBES GOLF

Golf funny exercise very foreign to honorable listeners so I explain game to honorable audience if possible for me to do so. Man from pocket extract small ball and put on small piece wood which man stick in ground with grout. He take from large bag a long stick which he swing furiously into ball, hitting some part of the way forward onto some grass not so far away from where start.

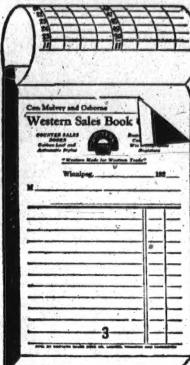

Man walk up to this round ball again and repeat process of hitting same with yet another long stick. He do this three, four, five, six times according to his strength and resolution for to hit ball far, when finally he come upon ball on a green patch of grass where there is contained a small round hole. He push ball up to this hole and keep hitting ball back and forth across hole all the time saying "nerts!"—Sun Dial.

"Say, dad, what keeps us from falling off the earth when we are upside down."

"Why, the law of gravity, of course, my son."

"Well, how did the folks stay before the law was passed?"

## Which no roller will deny!

A "jolly good" smoke indeed, the cigarette you roll with fragrant, friendly Ogden's Fine Cut. The more particular you are about your cigarette tobacco the more you'll feel like giving a "hip hip hurrah!" for Ogden's—and a "jig" when you use the best papers "Chantecleer" or "Vogue". And, by the way, there's a bigger package of Ogden's for 15c now.

P.S.—Your Pipe Knows Ogden's Cut Plug.

# OGDEN'S FINE CUT

## National Radio Program

A canvass of radio fans throughout the prairie provinces, if such a survey could be made reasonably representative of very diverse views, would undoubtedly reveal a mixed reception for the Canadian Broadcasting Corporation, as recently announced by L. W. Brockington, K.C., chairman of the board of governors of that institution, following its only meeting held outside of Ottawa to date.

Some of the plans announced at the close of the Regina sitting have undoubtedly caused disappointment. On the other hand some of them will meet with majority approval. There may be some who will see no good in anything that the Corporation proposes to do and it is quite possible there are a few who are ready to accept the announced program in toto and with every evidence of complete approval.

For the average "listener-in", who is not too discriminating, and that probably covers the majority, however, the objectives of the three-year program, which includes construction of four high-powered broadcasting stations in the period, two in the east, one on the prairies and one in the maritime, as well as other improvements, have something of merit, though some phases of the plans are disappointing.

It is disappointing, for instance, to find that nothing is likely to be done towards the construction of a 50,000 watt station in the west for at least a couple of years, while Ontario and Quebec, whose people have access to a number of good, high-powered stations on both sides of the international boundary, carrying excellent programs, are to be served entirely with stations as makeshifts as quickly as they can be built.

In the western provinces there are a good many "blind spots" which are now either not reached at all by good programs or only spasmodically. Until the proposed new national high-powered western station is constructed they will have to continue to go without a service or have to be satisfied with a doubtful one.

It is a matter for congratulation that during the past year or two there has been a gradual but quite perceptible improvement in the quality of the programs broadcast on the national chain, whether due to the change in administration or for some other reason, but this improvement only serves to accentuate the disappointment in the delay in bringing these programs to the door of everyone on the prairies able to own a receiving set.

In view of the recent improvement in the programs there will also be approval for the announcement of the intention to extend the C.B.C. service from its present six hours schedule to 12 and perhaps 16 hours a day, always provided, of course, that we have band agreements which may be made, will not confine the owner of the receiving set to one source for his entertainment and instruction.

As already stated, the quality of the programs broadcast over the national chain is materially improved, but that does not mean there is no room for further improvement. There is yet a substantial gap to be bridged before these programs can be classified with some of the best to be heard on the U.S. chains. For this reason, the C.B.C. has the intention to arrange for more exchanges of programs will be generally welcomed in the Canadian west. For the same reason, the average western radio fan still desires not only to retain what selective right conflicting radio bands permit him, but is anxious that interference should be further reduced. This question of interference is still one of the greatest grievances of the listeners-in on the prairies.

Possibly when the C.B.C. can offer programs of its own to match the best that is produced on the other side of the international boundary, prairie owners of receiving sets will not be so much concerned with interference of reception from other stations. If expense which cannot be met out of revenue stands in the way, the Canadian Corporation might well consider the advisability of embarking in the commercial field, at least in an experimental way and with safeguards against abuse by advertising media.

One of the proposals of the C.B.C. which should be received with approval by all hands is the announced intention to set up a school for radio announcers.

While there has been a marked improvement in announcing on both sides of the international boundary in the past two or three years, resulting in the disappearance of some of the worst crudities to which listeners were subjected in the use—or should it be abuse?—of the king's English, pronunciation and diction, to say nothing of modulation of voice, there is in this field also scope for betterment. A school for announcers, properly conducted should do much to iron out some remaining objectionable features indulged in by some announcers on occasion.

By and large, the Canadian Broadcasting Corporation, shows that it has some ideas, and that is something for which appreciation should be expressed.

An educated syrup pot has been invented by Clyde Munion, Oshkosh, Wis. When the lid descends after you pour the syrup, Munion's pitcher wipes itself with a device attached to the lid.

The unluckiest card in a pack of playing cards is the eight of spades, according to superstition. Napoleon Bonaparte ascribed his defeat to its influence.

"Once a road is laid down properly," says a building expert, "it shouldn't be taken up in a hurry." It isn't; the authorities spend months and months on the job.

## Has Had Many Adventures

Many Sensations Provided For World By Sir Herbert Wilkins

Sir Hubert Wilkins, who has had applications from 4,000 people anxious to accompany him on a submarine journey to the North Pole, is probably the most adventurous living Australian.

For many years he has periodically provided sensations for the world in feats of daring and endurance. Born at Mount Bryan East, South Australia, in 1888, at twenty he set out on a round-the-world voyage which took him to 26 countries. He made an extraordinary circumnavigation, he was signed on by a Persian firm as naval engineer at \$10,000 a year while still a minor. When he was 24 he became photographic correspondent with the Turkish army in the Balkan War of 1912-13.

His first taste of Polar exploration was in 1913, with Stefansson's Canadian Arctic expedition. Marooned in Arctic wastes, Wilkins did not learn of the Great War until 1915, and it was 1917 before he was able to get to France. In May, 1917, he obtained a commission with the Australian Flying Corps and later was made official photographer in the Australian historical section. While in France he was wounded nine times, twice mentioned in despatches, and awarded the Military Cross and bar. Since the war he has participated in a number of daring Arctic and Antarctic expeditions.

## Train Pilots In Vancouver

Reported Men Chosen For New Trans-Canada Air Line Will Be Trained At Coast City

The Vancouver Daily Province in a newspaper story said it had learned pilots chosen for the new trans-Canada air line will be trained in Vancouver this summer.

The paper said that by fall it was believed there will be "sufficient trained personnel to operate the Lethbridge-Winnipeg branch of the trans-Canada line."

Flight rovers work often on moving trains, chosen, apparently, in a sparsely settled country where a highway runs beside the tracks. Swinging off from box car roofs on rope ladders, they break the seals on the doors, climb in and toss out everything they can lay their hands on. Confederates in trucks pick up the loot.

The Association of American Railroads reported that claims resulting from freight car thefts in the U.S. and Canada totalled \$688,792 in 1936, lowest for any year on record. Biggest losses were in coal and coke, stolen not only by organized gangs but by individuals who needed fuel.

## Losses Were Lighter

Freight Car Robbers Not As Success-ful Last Year

Raiders by swooping bands on U.S. passenger trains did not long survive their most eminent practitioners, Jessie James. Much different in technique are the raids, still made on freight trains.

Flight rovers work often on moving trains, chosen, apparently, in a sparsely settled country where a highway runs beside the tracks. Swinging off from box car roofs on rope ladders, they break the seals on the doors, climb in and toss out everything they can lay their hands on. Confederates in trucks pick up the loot.

The Association of American Railroads reported that claims resulting from freight car thefts in the U.S. and Canada totalled \$688,792 in 1936, lowest for any year on record. Biggest losses were in coal and coke, stolen not only by organized gangs but by individuals who needed fuel.

## SELECTED RECIPES

### CHERRY CORN STARCH PUDDING

1/2 cup juice from canned red cherries  
3 tablespoons Benson's Corn Starch

1/2 cup cold cherry juice or water  
2 tablespoons lemon juice  
1/4 cup sugar

Method: Heat cherry juice to boiling in a saucepan. Mix Benson's Corn Starch and sugar to a paste with cold cherry juice; stir into hot juice. Cook over low heat for five minutes, stirring constantly. Add lemon juice; cook for 1 minute longer. Mould; chill thoroughly. Serve with whipped cream or "Crown Brand" Corn Syrup.

Th mudskipper fish of Portuguese West Africa cannot swim. This curiosity breathes through its tail and drown if it goes out of its depth.

## Dominion And Provinces

People Of Different Sections Should Try To Pull Together

In approaching the large question of the relations of the Dominion and the Provinces, as the country is doing now, everything depends upon the adoption by Canadians of a realistic, practical-minded attitude and appreciation of the great benefit that will accrue from clearing away the confusion that has existed for years and deciding upon a division of responsibilities which is actually best suited to present conditions with the social services and other problems that have come up in recent years.

The existence of Confederation presumes the desire of the people of the different sections to pull together as well as they can. The more they can pull together, the better for all. There has been a natural clinging to provincial jurisdictions and authority, but when a change in this respect is necessary, Canadians should be practical and wise enough to make it as far as is required to replace an ill-balanced and rather befuddled government system, which retards the progress of the country, with a better-ordered and efficient system that will facilitate greater national progress.—Winnipeg Free Press.

## Intelligence Not Impaired

Woman With Half Brain Has Superior Adult Mind

A 38-year-old Pittsburgh woman with only half a brain has learned in six months to do nearly everything she once could do when she had a whole brain.

With the half brain she rates an "intelligence quotient" of 115, on the Stanford-Binet scale. This is the mark of a superior adult mind and equals her once whole mind.

Her case, due to a recent operation in which the entire right brain hemisphere was removed, was reported to the American Psychiatric Association by Dr. Stuart N. Rows of Pittsburgh.

She does not readily recall events since the operation but she remembers perfectly telephone numbers and addresses she knew before.

## Usually Come High

Whatever The Outcome Strikes Are Very Costly Things

An observer estimates that the automobile strikes in Michigan cost a total of \$477,000,000. Of this amount \$267,000,000 represented automobile scheduled for construction; \$45,000,000 in wages lost by workers in industries supplying glass, metal and other equipment; \$137,000,000. Then there was the direct levy upon the State of Michigan and the various communities amounting to \$1,629,000 in extra relief costs. National Guard maintenance and lost sales taxes. Merchants and storekeepers, it is estimated, lost around \$18,000,000 in sales. Regardless of the cause or the outcome, strikes are costly undertakings.

February, on the average, is London's least rainy month, while October is the rainiest.

"Wrestling is an excellent aid to health," says a writer. "A grapple a day keeps the doctor away."

## WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rainin' to go

The Liver likes your food oily. If this bile is not flowing freely, your food doesn't digest. You feel tired and listless. You feel like your stomach. You get constipated. Harmful bacteria are not destroyed. Your body is tired and the world looks pink.

A more bowel movement is always a good thing. You can something that works on the liver as follows. It will take two pounds of bile flowing freely and make you feel like a new person. You can have the make this flow freely. They do the work called "liver cleaning". You can have this. Ask for Carter's Little Liver Pills by name. Stubbornly refuse anything else. 25¢.

## Sees Famine In Future

Scientists Warn That United States Must Adopt Soil Fertility Measures

Scientists on a world progress administration soil inventory project concluded that agriculture in the United States must "die of its own neglect" within 200 years and "the population follow suit" unless soil fertility measures are instituted.

The project, which state WPA Administrator William H. Green, was believed to be the first of its kind in the world, is directed by Dr. Jacob C. Lipman, chief of the division of soils and crops at the New Jersey agricultural experiment station at New Brunswick.

Using soil samples from 48 states to determine chemical resources, the WPA workers calculated that nitrogen, vital to plant life, will be exhausted from the soil within 224 years, sulphur will have disappeared by 2062, and "the eventual result will be a China-like famine in the rich country to the west."

"The soil nutrient losses were blamed on erosion, leaching (the action of water seeping through the earth); harvesting, livestock, burning and the rapid oxidation of organic matter in the soil."

## Not Hard To Do

Writing An Advertisement Does Not Require Any Great Skill.

The remark is frequently made by merchants, that they believe in advertising, but they do not know just how to write an effective ad. To which the reply is simple, that it does not take any particular skill to write a good selling notice. Of course, a clever writer may do somewhat better than others, but in the main what the public wants is information about goods, not smart wit and selling stuff.

If a merchant will simply tell the facts which fit his operation, and give the price of the goods, those simple things are enough to constitute a good advertisement. They interest the public, which is always looking for values. The description of any bargain is as interesting as any news in the newspapers.—Sarnia Canadian Observer.

## Has Its Drawbacks

If the house trailer has done nothing more it has put the country on a cash basis, at least for groceries. No merchant is going to depend on a backfire to warn him that a delinquent creditor is stealing away.

"You may have your belongings on credit, but you will pay cash for the bacon, if you live in a trailer."

## A REVOLUTION IN THE KITCHEN

Presto-Pack is a new and revolutionary way of handling Household Waxed Tissue. 45 sheets packed in an envelope which you hang on the wall. Then as you require it, just draw out a sheet at a time. You can't draw more. That's the beauty of it.

Try Presto-Pack today. You'll find it the handiest thing in the kitchen.

At grocers, druggists, stationers and departmental stores.

**PRESTO-PACK**

HAMILTON  
ONTARIO

Warehouses at Calgary, Regina and Winnipeg

"Can I interest you in our new gas stove, madam? I've just sold one to your neighbour."—1420 Florence.

## RUSH WORK ON HUGE ATLANTIC AIR TERMINAL

Newfoundland Airport.—More than 400 men are working daily at this once-isolated spot 150 miles northwest of St. John's, as a huge trans-Atlantic air terminal rises from virgin wilderness not far from the spot where the first flight across the Atlantic started 18 years ago.

Other workmen are rushing completion of accommodation for an additional 200 laborers, as government and air company officials press work on what is expected to become one of the most important links in trans-Atlantic air service. Resident engineers here expect the first flight, an experimental one, sometime in June.

But there is much to be done before a heavy trans-ocean plane can land here, so long as the runway strip 200 yards long will not be ready by June. When completed the base will have four huge runways, the first a mile long and 400 yards wide and the others the same length but only half the width. The full project will take about two years.

Bordering the airport is a large body of fresh water known as Gander lake, which will be used as a seaplane base, leaving Botwood field as an emergency landing spot. It was from Botwood, nine miles north, that the British flyers, Alcock and Brown, took off on the first successful plane crossing of the Atlantic in 1919.

Work on the project was started last July and now a fair-sized town is springing up.

### Lost Girl Is Found

#### Stumbles To Safety After Four Frightful Nights In Forest

Norquist, Sask.—A terrified and exhausted 10-year-old child stumbled to safety after four frightful nights amid tangled timber of the Porcupine forest, north of Pelly.

The lost girl was found 24 hours after another child had been rescued by Indians.

Little Lena Shkraba and 10-year-old Hazel Macayshayn went to look for stray cattle last Sunday. They became confused over the best route to their homes a half-mile away.

Deeper and deeper they wandered into the bush, where black bear and deer are still common, and on Monday the girls separated.

Late Wednesday the Macayshayn girl was found in a Ukrainian camp and was brought out to safety. On Thursday the second girl was found by a rancher's daughter.

More than 200 men joined in the unending search headed by R.C.M.P. officers and a plane was flown from Regina by Bob Eddy to help scan the bushlands.

Lena Shkraba struggled through the bush to the bank of the Swan river late Thursday. Her weak cries were heard by Margaret Anderson, young daughter of T. A. Anderson, former M.L.A., and now a Porcupine country rancher.

The Anderson girl ran to the river and found Lena nearly exhausted but able to walk to the Anderson home where she was given first aid.

Lena after taking some nourishment was able to tell a part of her sufferings for four days and four nights in the bush country, sleeping beside logs, wet and cold, and though visibly weak, had full control of her senses.

#### Dies From Gunshot Wounds

Tacoma, Wash.—Vernon "Blackie" Campbell, 23-year-old Hawaiian who escaped with Gordon Fawcett from Oskaloosa prison farm, The Dalles, B.C., April 4, died in hospital here. His death followed an emergency amputation of his left arm at the shoulder in an attempt to check gangrene developing from six gunshot wounds which ended his wild flight from Seattle police following his holdup of a hotel clerk in that city.

#### Egypt In League

Geneva.—Egypt was voted in the League of Nations by the unanimous vote of the 46 members of the assembly present. The vote came after a special committee had considered and passed on Egypt's request for admission. Earlier the issue of Ethiopia was raised without any decisive action occurring.

#### Child Eats Poison Tablets

Kingston, N.S.—Four-year-old Eva Parsons couldn't read the big name on the bottle of candy-coated tablets, so while her mother slept she ate 20 of the tablets, containing a poison. Eva died three hours later in convulsions.

## French Plane Forced Down

### Insurgents Riddle Transport Plane With Machine Gun Bullets

Bilbao, Spain.—Seven insurgent war-planes forced down a French transport plane in a hail of machine gun bullets near here and wounded a Spanish passenger and Jean Gally, veteran French pilot of the Biarritz-Bilbao air line.

The insurgent air fleet, surrounding the "Aer Pyrenees" plane near Sopela, 8 miles north of Bilbao, forced Gally to "pancake" his liner on a strip of sandy soil behind the government lines.

Gally and the wounded passenger were rushed by automobile to the besieged Basque capital for treatment. The pilot, suffering head wounds, immediately underwent an operation but was expected to recover.

The three other passengers, including one woman, Antonia Laranga, were unhurt. The transport plane, however, was badly damaged by making a forced landing and by the barrage of bullets.

The insurgents sprayed machine gun bullets into the liner. One slug struck Gally.

Passenger attributed their escape from death or serious injury to the pilot's skill and the speed of the plane, which has a maximum of 230 miles an hour.

The transport plane, clearly marked with French registry numbers and its name, was engaged in shuttle service between Bilbao and Bayonne, France, near Biarritz.

## Grazing Of Cattle

### Four Acres Of Grass Needed For Each Head Of Stock

Medicine Hat, Alta.—A scale of 40 acres for each head was necessary for thrifty grazing of cattle, E. B. Thomson, superintendent of the experimental station at Swift Current, Sask., told 200 ranchers of southeastern Alberta at the Short Grass Stock Growers' Association convention.

"Over-grazing is a great concern to all of us," Thomson said as he told of work at the experimental farm at Manyberries, Alta., 25 miles north of the international boundary. He told the ranchers control of grazing lands was in their own hands. "No government can bring back the grass," he added.

Another speaker at the meeting was Glen A. Smith, of the United States department of agriculture in Montana. He said \$3,000,000 had been spent there in recent years in water conservation and development work.

A voluntary agreement covering rehabilitation of range lands was drawn up by the meeting and signed by 34 ranchers whose holdings and leases cover more than 2,000,000 acres.

## Landed At North Pole

### Third Soviet Supply Plane Descends With Supplies

Moscow.—The third supply plane of the Soviet Union's North Pole expedition, missing for some days, was reported later as landed safely somewhere near the pole. Prof. Otto J. Schmidt, leader of the expedition, radioed the "apparently" the plane, piloted by I. P. Makaruk, had come down "safely" to the pole.

Makaruk's plane was one of three which took off from the Rudolf Island base, carrying a year's supplies for the party of four who are to remain on the ice near the pole for a year. Rudolf Island is about 560 miles from the pole.

Pilot Vassily Molokoff brought his heavily loaded plane down at the camp established by the advance party of 13 who flew to the neighborhood of the pole May 21. The second plane, piloted by A. D. Alexeef, came down safely about 13 miles beyond the pole after over-shooting its mark.

The three planes took off from Rudolf Island with their eight-ton cargo of food and supplies, Molokoff completing the 560-mile dash in seven hours and 24 minutes.

#### To Destroy Weeds

London.—No more back-breaking weed pulling jobs for Great Western Railway seconmen. In future a special tank train, capable of spreading a 100-ton load of solution along the right-of-way for 25 miles at the rate of 400 gallons a mile without a refill, will patrol the 500 miles of branch-line trackages.

#### Decorated By The King

London.—Nine Canadians were among 127 men and women who were decorated by the king with various insignia of the Order of Saint John of Jerusalem at Buckingham palace. Mrs. Lillian Boyd of Montreal, only woman among the Canadians, was invested with the grade of serving sister.

## To Curtail Relief

### Single Unemployed In Ontario Must Look For Jobs

Toronto.—Premier Hepburn announced that starting June 1 all single unemployed in Ontario would be taken off relief rolls and compelled to find jobs. He said the government will resume its farm employment campaign and will pay transportation costs of single unemployed for farm jobs.

The premier told a delegation of unemployed the government will not extend its present works program nor will it now adjust relief rates.

## SAYS SURPLUS WHEAT WILL BE SOLD BY AUGUST

Regina.—Surplus wheat stocks in Canada will be the responsibility of the wheat board, which have been accumulating since 1927-28 and will be disposed of by the end of the present crop year, July 31, according to James R. Murray, chairman of the wheat board.

The board did not handle any of the 1936-37 crop. When the price of 87½ cents was fixed last year, an order-in-council from Ottawa was passed prohibiting the board from accepting delivery unless the price fell below 90 cents. The price never went below that level.

Hint of the complete disposition of the board's surplus was given by Mr. Murray when he gave evidence before the Turgeon grain commission. He indicated that if a wheat board operated for the 1937-38 crop year, it would start with a clean slate and no carryover would be concerned. Later he was asked if he meant that all wheat held by the board would be sold by that date and the reply was: "That is right."

When the board over which Mr. Murray presides took over Dec. 2, 1935, it had 205,186,980 bushels of wheat and wheat contracts that all carryover was concerned. Later

Mr. Murray said in his evidence to the commission said that in addition, the board had received 90,189,187 bushels of the 1935 crop, on hand at Nov. 30 that year, and another 47,973,371 bushels of the 1935 crop which was delivered during the rest of the crop year after Dec. 1, 1935. This made a total of 343,349,538 bushels of wheat and wheat contracts to date with the board.

In a report to the Turgeon commission, it was shown that the board held 84,698,852 bushels of old wheat and 2,030,761 bushels of 1935 crop at July 31, 1936.

At the end of November, 1936, all the 1935 crop had been disposed of and at Dec. 31, 1936, the board held 54,491,000 bushels of old stock. This amount would be disposed of at the end of the present crop year, Mr. Murray said, and the board's stocks would be cleared of old supplies.

#### Stand By The League

Hamilton, Ont.—A resolution calling for a stand by the League of Nations was adopted by the international conference of agriculture, political and civic dignitaries at the cow boy contest, dressed in picturesque range land regalia, will pay tribute to "their friend," four times bronk riding champion of the world.

#### OXFORD GROUP FOUNDER GOES TO NETHERLANDS

Dr. Frank N. D. Buchman (right), founder of the Oxford Group, and Eric Leslie (left) of Toronto, photographed as they arrived at Amsterdam by air liner to take part in the launching of a new campaign before 10,000 persons at Utrecht's largest hall. Twelve Canadians, who sailed from the Dominion to attend the Coronation celebrations in London, travelled with Dr. Buchman and took part in the campaign.

## LL.C. DELEGATE

Dr. W. A. Riddell, resident Canadian Advisory Officer to the League of Nations, who will be a Dominion delegate at the 23rd session of the International Labor Conference at Geneva.

## Laws Of Averages

### Scientist Predicts Results Of Game Of Chance

Toronto.—It's a million steel balls bouncing on a steel plate at Queen's University or dropping from holes punched in it prove to Dr. A. L. Clark, dean of the university's faculty of applied science, that "the laws of probability may be used to predict phenomena with high degree of accuracy."

In a paper presented before the Royal Society of Canada Dr. Clark said application of the laws of probability is far wider than its first use, efforts to predict results of games of chance.

"If a perfect coin is tossed properly it may show heads or tails," he illustrated. "Either is as probable as the other. So the probability that it will be one or the other is exactly one-half. If it be tossed 1,000,000 times each face will appear 500,000 times."

"Ordinary dice have six faces, so the probability that any selected face will appear is one-sixth. If two dice are thrown any called combination of faces has a probability of 1-36 since there are 36 ways in which different combinations may appear."

"Probability has very little meaning for a small number of events but its meaning grows as the number of events increases."

## Honored In Death

### Tribute To Be Paid To Pete Knight, Champion Bronk Rider

Calgary.—Silent tribute, followed by a period of prayer, will mark a remembrance ceremony for Pete Knight, world's champion bronk rider, when the Calgary stampede is opened July 5.

In the mid-area where Knight, a Crossfield, Alta., cowboy, killed by a wild, plunging bronk at Hayward, Calif., rode to fame, he will be honored in death.

After the opening ceremonies, to be attended by Hon. James Gardner, federal minister of agriculture, provincial and civic dignitaries, the cow boy contestants, dressed in picturesque range land regalia, will pay tribute to "their friend," four times bronk riding champion of the world.

The issue over Ethiopia lies primarily between Britain and New Zealand. Despite the new year's declaration of Anglo-Italian friendship, relations between the two countries have not improved.

Italian radio stations broadcast anti-British propaganda to the near east. Italian newspapers "cried" the coronation.

Foreign Secretary Eden, trying to make the best of a bad job, said recognition in Ethiopia by Britain and recognition in Italy's conquest, New Zealand, which has a Labor government, is unwilling to recognize the Fascist victory. South Africa takes a somewhat similar view. The decision of the Ethiopians not to send a delegation to the special league assembly has lifted the question from the urgent list.

Hopes were expressed that the new committee on munition supplies may become a permanent body—its functions not to include questions of policy. Points before it will include the building of empire arms factories in the Dominions, which would be safe from air attack and would be able to supply Britain in wartime.

Measures will also be advanced to ensure that arms equipment shall, as far as possible, be interchangeable.

## Appointment Announced

### R. M. Scott Heads Agricultural Markets Information Service

Ottawa.—Appointment of R. M. Scott, of Winnipeg, as chief of the new Dominion agricultural markets information service, announced officially by Hon. G. G. Gardner, minister of agriculture, is indicative of the vigorous policy adopted by the director of marketing, A. M. Shaw, under whom Mr. Scott's activities will be supervised. It is the intention of Mr. Shaw to disseminate to every corner of the empire as well as in Canada all possible information of the superior qualities of Canadian farm products.

The organization which will be established and distributed under the direction of Mr. Scott will embrace everything from daily price quotations and market trends for producers to advice to consumers.

A divisional radio price distribution service for growers will be operated together with bulletins to consumers in Canada. Especial attention will be given to promoting markets for the most suitable products from the various growing areas of Canada.

## PAUL F. BREDT IS ELECTED HEAD OF POOL AGENCY

Regina.—Paul F. Bredt, president of Manitoba Pool Elevators, Ltd., was elected chairman of the central selling agency of the Manitoba, Saskatchewan and Alberta pool organization at a meeting of the directors. He succeeds L. C. Brouillet of Regina, who died recently in Vancouver.

George Bennett, Mannville, Alta., a director of the Alberta pool, was elected vice-chairman and H. Wesson, Maitland, Sask., president of the Saskatchewan wheat pool, was chosen to represent Saskatchewan on the executive.

Lou Hutchinson of Duhame and Ben Plumer of Pasqua are Alberta's other two representatives on the directorate while Col. Burnell, Okotoks, and J. W. Baldwin, Reston, represent Manitoba and Brooks Cotton, Hanley, and Leonard Widdup, Kipling, represent Saskatchewan. F. W. Ranson, Winnipeg, continues as secretary of the central organization.

Born in Leipzig, Germany, in 1883, Mr. Bredt came to Canada in 1900 and settled at Edenfield, Sask., 20 miles northeast of Regina. He graduated with honors from the Manitoba Agricultural College in 1914, winning the lieutenant-governor's silver medal in his last year.

After graduation, Mr. Bredt became acting livestock commissioner in Saskatchewan and then went farming at Kemnay, Man., which is still his home. Mr. and Mrs. Bredt were married in 1919 and have a daughter and two sons.

Always an advocate of co-operation, Mr. Bredt joined the Manitoba pool on its organization in 1924 and in 1926 was elected a director. He became vice-president in 1927 and when the pool elevator company replaced the wheat pool in 1931 he was elected president and managing director. He still heads the pool. He has been a member of the central board since 1927 and the central executive since 1931.

Mr. Bredt was named to the board of governors of the University of Manitoba in 1933 and has also been a member of the grain standards board for several years.

## Might Be Popular Choice

### Duke of Kent Suggested As President Of Irish Free State

Dublin.—A suggestion that the Duke of Kent be invited to become president of the Irish Free State when the new constitution goes into effect was made in a letter to Dublin newspapers by Alastair McCabe, former member of the dail sinn Féin.

"In view of the fact that it will be practically impossible to get any man sufficiently detached from politics to fill the office in this country," McCabe asked, "would it not be a good idea to get a member of the British royal family, the Duke of Kent for instance, to allow his name to go forward for the position?"

"If a member of the royal family was selected the devolving personal antagonism prevalent in party politics would be little scope for play. There is every possibility a candidate like the Duke of Kent would be a popular choice."

"There is no reason why the president in such circumstances could not become at once the embodiment of the United Ireland idea for a prince-president could hold the office of governor of northern Ireland as well."

## Canadian Legion

### Saskatchewan Convention To Be Held At Saskatoon

Ottawa.—Hon. C. G. Power, minister of pensions and national health, will attend the Saskatchewan convention of the Canadian Legion at Saskatoon on June 14, and on June 16 will be present at the convention of the Alberta command at Lethbridge.

Importing the idea of the Ottawa Medical Association on June 21, will necessitate the minister's quick return to the capital.

Mr. Power hopes to return west and visit the Pacific coast later in the year.

## Airport For Toronto

Ottawa.—Combined land and sea-plane facilities for Toronto capable of handling all forms of air transport and costing approximately \$1,500,000, is the goal of a three-year project agreed upon here in conferences between representatives of that city and officials of the department of transport.

Neville Chamberlain succeeds Stanley Baldwin as Britain's premier.

Two Canada geese flew westward over Blairmore on Thursday evening last.

Expecting to be away for the summer, Mrs. D. G. Mackenzie left Calgary Tuesday for Eastern Canada.

In the absence of the pastor, Rev. A. E. Lark, the evening service at the United church on Sunday last was conducted by Mr. W. Dutton.

Legislation providing for licensing of all livestock dealers in Alberta, passed at the last session of the legislature and proclaimed by order-in-council May 15th, will not be enforced.

James Ford, secretary-treasurer of the town of Coleman and Coleman school district, proposes taking a three months' rest for the benefit of his health.

The Duke of Windsor and Mrs. Wallis Warfield were married by religious ceremony in France yesterday. The Archbishop of Canterbury protested the authority of Rev. R. Anderson Jardine to perform the ceremony.

#### CARD OF THANKS

Mr. R. Harris and Mrs. A. Taylor, of Hillcrest, wish to thank those who sent floral tributes, also loaned cars in their recent bereavement.

**FEMALE HELP WANTED**  
WOMEN WANTED to plait and hand-stitch light leather table runners at home. Good pay. Experienced necessary. Write Dept. 641, Leather Crafts, 414 Bay Street, Toronto, Ontario. [17-14-21]

William Carswell, of Glasgow, Scotland, brother of the late Alan Carswell, has arrived in Lundbreck.

It will still require more doctors of laws than we have to cure theills in Alberta's legislation.

Victoria Day, May 24th, saw another large batch of income tax rebates arrive, and many smiles of joy resulting therefrom.—Ex.

The regular meeting of Crows' Nest Chapter I.O.D.E. will be held in the Anglican hall on Monday, June 8th, at 7.30 p.m. This being the last meeting till after the summer months, all members are requested to attend.

Joseph Frost, who has been employed in the Revelstoke C.P.R. shops for many years, has been promoted to the position of night shop foreman at Crowsnest. He is a son of Mr. and Mrs. Michael Frost, of Cranbrook.

A fine of \$300 imposed on Peter Krill, of East Coulee, recently, under the Liquor Act, was upheld by Judge A. M. MacDonald in District Court at Drumheller on Friday last. It is understood that a further appeal is to be lodged.

The King has conferred on retiring Prime Minister Baldwin the highest distinction in the gift of the crown, a Knighthood of the Garter. The honor was in addition to the earldom which Mr. Baldwin has accepted for himself and his descendants. The order, instituted by King Edward III in 1348, is limited to the sovereign, princes of the blood, foreign monarchs and 25 knights-companion, of whom Baldwin will be one.

Mr. G. Passmore, of Cranbrook, came to Cranbrook last week and spent a short time here. He continued to Nelson, accompanied by his daughter, Miss Mildred Passmore, and they visited friends there for the holiday.—Cranbrook Courier.

Mr. Grant Hall, widow of the former senior vice-president of the C.P.R., died at her residence in Montreal on May 22nd. Mrs. Hall resided in the west for some time and spent some years at Revelstoke thirty-odd years ago, when her husband was foreman of the C.P.R. shops.

Mrs. E. Gostick, Social Credit member of the Alberta legislature for Calgary, declared that "she had heard there has been a fund of \$3,000,000 raised to defeat Premier Aberhart." She added that, in her opinion, the amount was anywhere from \$30,000,000 to \$300,000,000. Next silly statement, please?

Rev. Roy C. Taylor, M.P.P. and deputy speaker, has received a unanimous call from the congregation of the Coaldale United church to continue as pastor at an increase in salary. Rev. Peter Dawson, M.P.P., will also remain at Champion. Mr. Dawson is rector of the Alberta house.

In the last British Columbia election, Tom Uphill, C.C.F. Labor candidate, polled 1534 votes against Harry Douglas, Liberal, with 1245, giving Uphill a majority of 339 in the Fernie riding. In the Cranbrook riding, F. M. MacPherson, Liberal, had a majority of 1659 over Charles Bennett, C.C.F.

The marriage took place at St. Albin's church, Colemore, on Monday, of Miss Lyla C. Bent, of Lundbreck, to Mr. W. H. Whitcomb, of McGillivray, B.C. Rev. A. S. Partington performed the ceremony. The bride was attended by Miss Kathleen Cosstick, of Bellevue, while Mr. H. Lawrence Bent, brother of the bride, supported the groom.

Mrs. Gostick talks about a fund of \$300,000,000 having been raised to fight Social Credit. Why not make it a billion dollars? So far Mrs. Gostick has not put up a single word of evidence to prove any of her wild statements. Even Premier Aberhart has disputed some of them. Anything the Calgary lady says can be treated as five o'clock tea gossip.—Lethbridge Herald.

The province of Manitoba has appointed a real printer with over thirty years of experience behind him, as king's printer. The new appointee is J. L. Cowle, editor of the News at Carberry, Manitoba. Thirty years ago Jim Cowle left the Ottawa Valley to seek fame and fortune in the golden West. Donald Fraser, another printer-editor, of New Glasgow, Nova Scotia, has received a government appointment as registrar.

## Local and General Items

The Editor will be pleased to receive items for this section, regarding visitors entertained, parties leaving for holidays or short trips, bridge parties, teas, etc. Please items in to us or hand them in at The Enterprise office no later than Wednesday evenings.

The Blairmore Canuck's baseball team lost to Natal Miners on Sunday 7-6.

Communist speakers are travelling through Alberta, boasting for the Aberhart government.

Extensive improvements are being effected to the interior of the Blairmore Grocery store, of which John Kubik is proprietor.

The expenses of the president of the United States and the upkeep of the White House total about \$450,000 annually. King George's civil list normally appropriates \$2,888,900.

All Social Credit candidates in the B.C. election lost out. Their deposits will enrich the treasury of our neighbor province to a far greater extent than Alberta has in any way profited from Social Credit.

Mrs. G. Passmore, of Blairmore, came to Cranbrook last week and spent a short time here. She continued to Nelson, accompanied by her daughter, Miss Mildred Passmore, and they visited friends there for the holiday.—Cranbrook Courier.

Mr. Grant Hall, widow of the former senior vice-president of the C.P.R., died at her residence in Montreal on May 22nd. Mrs. Hall resided in the west for some time and spent some years at Revelstoke thirty-odd years ago, when her husband was foreman of the C.P.R. shops.

Dentists are men who bore you to tears.

The fish in the various local district streams will be holding farewell parties during the next ten days or so.

The McDougall quints held a mass meeting in Blairmore on Thursday night last.

The interior of the local B.E.S.L. club premises have this week been decorated by the Britannia Paint Co., of Bellevue.

At the end of every sentence in a telegram appears the word "stop," and at the end of many a remark made by certain Social Credit M.L.A.'s should be heard the word "bull!"

As a souvenir of the Coronation, King George VI, has presented Prime Minister Mackenzie King with autographed photographs of the King and the Queen. The photos are mounted in silver frames.

The Pattullo Liberal slate in British Columbia were returned to power, including Tom Uphill, Labor, for the Fernie riding. Uphill enters upon his fifth term as representative of the East Kootenay riding in the B.C. legislature.

Thirty years ago, the Cranbrook Herald reported there were excellent prospects that there would soon be telephone connection between Cranbrook and points along the Crowsnest.

A Scottish farmer walking home from kirk with his wife and thinking over the sermon, in which the minister had expounded graphically on everlasting punishment, exclaimed: "Mary, it canna be! It just canna be! No man's constitution could stand it!"

Miss Helen Morrison who has been attending the Alberta University at Edmonton, returned to Cowley last week. She was accompanied down from Calgary by her mother, Mrs. H. C. Morrison, who had been visiting in the city with her sister, Miss Edna Fulton.

To meet the convenience of the travelling public, which always takes advantage of holidays to travel from one point to another, the railways are offering special fares for the King's birthday holiday, June 9th. For this holiday, special fares go into effect Tuesday, June 8th, and tickets are good for return not later than Thursday, June 10th.

Nell Cameron, who at one time was on the teaching staff of the Wayne school, and for some time has been taking a special course at the Calgary Institute of Technology, has been appointed teacher of general shop work on the Drumheller school staff. This appointment is one made necessary under the new public school curriculum. A further appointment, that of teacher of household economics, will be considered by the Drumheller board.

Remember the "Hobby Fair" at the United church auditorium Saturday. Over one hundred entries, no charge, sales—just an exhibition of children's handwork. The habit should spread to all children in Blairmore. The idea behind it is home training for children. Hobbies will include stamps, cooking, candy, photos, curios, knitting, models, plants, drawings, etc. See this exhibition on Saturday, from 2 to 5 p.m. A second one will be staged in the fall.

His Excellency Frances P. Carroll, bishop of Calgary, paid his first official visit to Pincher Creek on Saturday. On Sunday morning the sacrament of confirmation was administered to a class of fifty children. In the afternoon confirmation service was held at St. Henry's church, Yarrow. On Monday a banquet was tendered in honor of the bishop at which Rev. Dean Harrington, Mrs. L. L. Morgan and others from Blairmore attended. His Excellency returned to Calgary on Tuesday.

The towns of Clive and Calmar suffered from serious fires this week.

The main objection to gardening is that by the time your back gets used to it your enthusiasm is gone.

We understand that Cliff Church is holding a mass meeting in Blairmore on Thursday night.

A herd of Newfoundland caribou are being exchanged for a herd of New Brunswick red deer.

Mrs. H. L. Jordan, Lethbridge manager of Western Grocers Ltd., was a business visitor to Blairmore on Friday last.

William Cherniwhan, a C.P.R. section man, was killed when hit by a freight train at Courier, about fifteen miles west of Fernie, on Sunday.

Rev. A. E. Lark returned the early part of the week from Calgary, where he has been in attendance at the annual conference of the Alberta United Church.

Robert Livett, president of District 18 of the United Mine Workers of America, spent the week end in this section of the Pass, and attended a meeting of miners at Hillcrest on Sunday afternoon.
